

Generating a hash of the external system administrator password (SysPwd)

1. Go to the website <https://emn178.github.io/online-tools/sha256.html> (if unavailable, use another Sha256 generator).
2. In the Input field, one by one, without spaces, insert the salt **IERRPaiLwYubIfY38XptqqHw1eF5RE6N**, then the external system administrator password (salt is underlined in black, the external system administrator password is blue).
